Description

Open Rack Wallmount is an efficient and versatile server rack designed for wall-mounted installations. Unlike enclosed wallmount racks, this open-frame model provides unobstructed access to mounted equipment, making it ideal for environments that require frequent maintenance, cable management, or airflow optimization. The swing-out design allows the rack to pivot 90 degrees, enabling convenient rear access without the need to dismount equipment.

Specification	Details
Product Type	OW15
Size	15U
Weight	± 7 kg
Dimension (DxWxH)	530 * 520 * 762
Complete Set with	4 pcs Dynabolt
	30 set screw and cagenut

Specifications

International Compatibility : Designed in accordance with the 19-inch international standard, metric system, and ETSI specifications, ensuring broad compatibility with IT and telecom equipment.

Robust & Stable Construction : Manufactured with a welded steel structure that guarantees durability, rigidity, and long-term reliability.

High Load Capacity : Supports up to 60 kg static load, suitable for networking, server, and electronic devices.

Swing-Out Functionality : 90-degree swing mechanism provides easier installation, maintenance, and cable routing without dismantling.

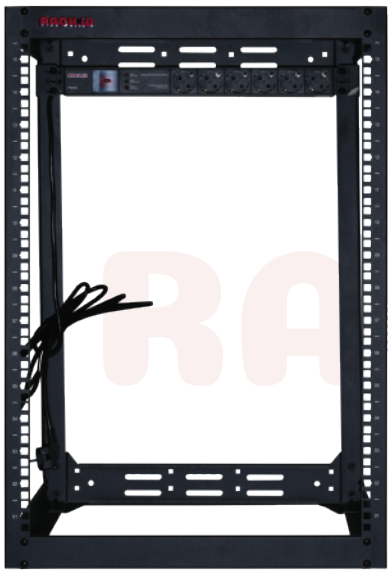

Space-Saving Solution : Wall-mounted design maximizes floor space while keeping equipment organized and accessible.
